

# ADVANCED PROGRESSION CENTRES

## (APCs) - Maths

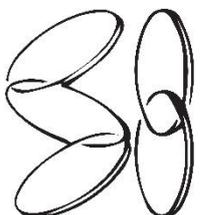

The APCs provide an exciting opportunity for more able learners to develop their enthusiasm in creative ways and work with children of similar ability.

At each APC the children will be given the opportunity to develop their maths skills in greater depth. The children will also be encouraged to use the skills developed back in their normal classroom environment, which further supports their progression.

Within the maths sessions, emphasis will be given to mastery of the subject and reasoning.

### The structure of each APC:

- Six x 75 minute sessions in Maths
- Sessions are run on a weekly basis after school
- Targeted at the more able learners in Years 4, 5 & 6
- Delivered by an experienced teacher (fully enhanced DBS)
- Certificates for all children
